

Todo App Documentation

Created by  Jatin Prajapati

Mini Hackathon – Sheryians Coding School

- Project Name : Redux Toolkit Todo App
- Live : <https://my-cohort3-0-redux-toolkit.vercel.app/>
- GitHub repo : <https://github.com/Jatin-CodeLab/my-cohort3.0-World/tree/main/projects/redux-toolkit>

Project Overview

Todo App ek simple aur responsive task management application hai jisme user apne daily tasks ko add, update, delete aur manage kar sakta hai. Application Redux Toolkit ka use karke global state manage karti hai aur LocalStorage ke through data ko browser me permanently save karti hai.

Personal Detail :

- Name : Jatin Prajapati.

-  : [jatin.prajapati2908](https://www.instagram.com/jatin.prajapati2908)

Technologies Used

- React.js

- Redux Toolkit
 - React Redux
 - React Hook Form
 - Tailwind CSS
 - Lucide React Icons
 - LocalStorage
 - JavaScript (ES6+)
-

Project Structure

```

```

Libraries Used

1. React ka use UI banane ke liye kiya gaya hai.

Features:

- Component Based Architecture

- JSX
- State Management
- Reusable Components

2. Redux Toolkit ka use application ki global state manage karne ke liye kiya gaya hai.

Use kiye gaye methods:

- configureStore()
- createSlice()
- nanoid()

Actions:

- addTodo
- toggleTheme
- removeTodo
- updateTodo

3. React Redux

React components ko Redux Store se connect karne ke liye use kiya gaya.

```
useDispatch() useSelector()
```

4. React Hook Form

Form handling aur validation ke liye use kiya gaya.

Hooks:

```
useForm()
```

Methods:

```
register()
handleSubmit()
reset()
formState.errors
```

Validation:

```
required
```

5. Tailwind CSS

Application ki styling Tailwind CSS se ki gayi hai.

Use kiye gaye concepts:

- Flexbox
- Grid
- Responsive Design
- Hover Effects
- Rounded Corners
- Shadows
- Dark Theme
- Transition Animations

6. Lucide React

Icons ke liye use kiya gaya.

Icons:

- Plus
- Pencil
- Trash2
- Sun
- Moon

7. LocalStorage

Todos aur Theme ko browser me permanently save karne ke liye.

Methods:

```
localStorage.setItem()  
localStorage.getItem()
```

```
JSON.stringify()  
JSON.parse()
```

UI Features

- Modern Design
 - Responsive Layout
 - Beautiful Buttons
 - Icons Support
-

Learning Outcomes

Is project me maine ye concepts practically implement kiye:

- React Components
 - React Hooks
 - Redux Toolkit
 - Global State Management
 - React Hook Form
 - CRUD Operations
 - LocalStorage
 - Tailwind CSS
 - Responsive Design
 - Form Validation
 - Component Reusability
 - Modern UI Design
-

🙏 Thank You

Hare Krishna
